

BSPED statement on Covid-19 vaccination in children aged 12 - 15 with underlying health conditions

The Joint Committee on Vaccinations and Immunisations (JCVI) has issued updated guidance on vaccination in children aged 12 to 15 years with underlying health conditions. Their advice is that the following groups of children with diabetes or endocrine disorders should be offered COVID-19 vaccination

- * Diabetes mellitus (including non-type 1 diabetes)
- * All children on replacement or high dose steroids
